

Cooling - Heating - Stirring

Easy tempered stirring of samples
right on top of your lab bench!

CoolHeater®

*Are you
still cooling
with ice?*

CoolHeater®

Magnetic stirrers intended for users in Biotech, LifeScience and other areas

- **Convenient** - Cools, heats and stirs samples directly on the laboratory bench
- **Compact** - Replaces bulky refrigerator equipment, ice and water baths
- **Precise** - Temperature control from 0 to 100°C
- **Flexible** - Beaker and up to 5 Eppendorf test tubes at the same time

Application examples

- Stirring of heat-sensitive substances such as enzymes or proteins
- Dialysis directly on the lab bench
- Recrystallisation
- Long-term reactions at constant temperature
- Organic synthesis in micro-scale

Technical data

Temperature range: 0 to 100°C
Plate dimension: 80 mm x 100 mm
No of Eppendorf tube seats: 5
Stirrer velocity: 0 - 2000 rpm
Power requirement: 100-230V
Manufacturer: Implementa Hebe AB

Art no	Product	No/package
2101-01	CoolHeater® - grey	1
2101-02	CoolHeater® - blue	1
2101-03	CoolHeater® - red	1
